Now there is a way to sand dust-free.

User guide

Plaster

Wood

Paint

Mirka's net sanding concept has revolutionised sanding. The patented solution – a sanding net with thousands of holes means you can achieve a perfect result every time – without dust. The dust is effectively reduced as it is drawn through the thousands of holes and makes the working environment virtually dust-free.

The Mirka net sanding concept is a unique invention, that gives you many advantages.

- **Healthier working environment** – Dust-free sanding
- **Saves time** – No dust, reduces clean up time
- **Saves money** – Net sanding products are less likely to clog and therefore last longer than traditional paper products
- **Practical** – No need for covering material or equipment
- **Easy to use** – The hook and loop system means the net sanding product attaches easily to your sanding tool
- **Quality finish** – The unique net qualities create a finer scratch pattern resulting in a better surface finish

Grit recommendations	
Plaster sanding of walls and ceilings before painting or decorating	P120
Walls, ceilings after painting	P120 > P180
Doors, windows and furniture • intermediate sanding • paint removal	P120–P180 P80
