NovastarTM

Surpass your expectations.

Introducing NovastarTM. Tackles demanding surfaces with unexpected ease. Made with state-of-the-art technology. The remarkable cut of Novastar in coarse grits and outstanding surface finish of finer grits gets the job done faster in fewer steps. This tough film abrasive is made to last and keeps on sanding for longer. The new precision coating practically repels dust, so there is no clogging.

Dust extraction is efficient and convenient with Mirka's new multihole pattern. Just place and go. Novastar is ideal for hard surfaces where a robust abrasive is needed. When sanding feels like a challenge, let Novastar surpass your expectations.

Take your performance to the next level. Intelligent Abrasives[®] by Mirka

Take on the challenge. Experience the difference.

Industrial Surfaces

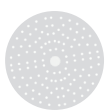

Woodworking

Key Features

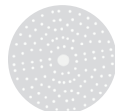

- Aggressive initial cut for heavy duty applications in lower coarser grits
- Long lasting disc life means excellent performance using fewer discs
- Consistent scratch pattern provides the desired finish
- Effective multihole pattern delivers outstanding performance without clogging
- Premium film backing offers outstanding edgewear resistance, flexibility and grain adhesion

Applications

• Wood Processing • Composites Processing • Vehicle Manufacturing • Marine • Automotive Refinishing

125 mm
89-Hole

150 mm
121-Hole

Technical specifications

Grain	Ceramic / Aluminium
Colour	Transparent
Backing	Polyester film
Bonding	Low VOC resin system
Grit range	80 – 600
Attachment	Grip
Coating	Semi-open
