

# Mirka® PROS Self-Generated Vacuum (Available in 5" and 6" models)

The Mirka® PROS SGV sander was specially developed to produce maximum dust extraction, even at low suction power, due to a wider dust suction outlet in the machine housing. Equipped with a new type of fleece dust bag, the PROS SGV has a larger dust collecting capacity and a longer life time, compared to other similar products on the market. This fleece dust bag does not require a safety nylon bag for protection.

## FEATURES AND BENEFITS:

- Easy to reach speed regulator
- Unique shroud system with brake seal allows excellent dust extraction, even at low suction power
- Optimized ergonomics make it comfortable to grip for long operating periods
- Cover lifts for access to the air supply connection, locking the lever in the off position
- Fleece dust bag has a large capacity which means fewer bag changes
- Fleece dust bag has a longer product life
- No need for a safety nylon bag for protection
