Mirka[®] PRO Finishing Solution

An easy & fast solution for spot repair

Dust particles and other defects can be a challenge when striving to manufacture products with a perfect glossy surface. Removing these defects is crucial to achieving a consistent finish. Now Mirka offers a simple, fast and reliable system for a high-quality surface finish, **The Mirka PRO Finishing Solution.**

The Mirka PRO Finishing Solution combines spot sanding & polishing to give you that pro-level result.

MIRKA

THE PRO FINISHING SOLUTION

is a system that is aimed towards
OEM & Automotive manufacturers.

THE PRO FINISHING SOLUTION

THE PRO FINISHING SOLUTION is designed for easy and fast removal of defects and imperfections from the final surface. This post-paint process combines Mirka's surface finishing experience with innovative abrasives and cordless tools. It is easy and fast and produces a high-quality result.

FEATURING THESE MIRKA PRODUCTS

Mirka Iridium® SR 7 abrasives

Mirka® ARP-B 300NV and
Mirka® AROP-B 312NV

Polishing Foam Pad: Yellow,
White, Burgundy or Orange Waffle.

PRO Iridium™ 1250
polishing compound

THE PRO FINISHING SOLUTION PROCESS

Sanding the imperfections is done
with our cordless spot repair sanders
and Mirka Iridium® SR spot repair discs.

Apply Mirka's newest addition to the
range of polishing products: PRO
Iridium™ 1250 Polishing Compound.

The sanded area is then polished using
Mirka cordless polishing machines
and PRO polishing pads.

Normally polishing when removing surface defects is a two-step process, where you use one compound to remove the scratch marks from the sanding. PRO Iridium™ 1250 is developed to give you the best of both worlds, meaning you only need to polish once, while still getting a perfect result.
